Objective

Run the VQ-BeT model

Details

1. VQ-BeT could be found in LeRobot's Github page - LINK
2. Read about VQ-BeT.
   a. Here is the project website - LINK
   b. Here is the YouTube video about it - LINK.
3. Please set up LeRobot's github repo (point 1) and run the VQ- BeT model from it.
4. You do NOT need to train it, you just need to run the model and share the videos.

Submission

1. Upload all the results to a google drive folder
2. Share the access to the google drive folder to puru@mowito.in
3. Please send the link in the same email thread where you shared the other information.

Judging Criteria

1. We want to check if you can run models.
2. We further want to see how much you understand about transformer-based models for robots. So definitely read about it, and we will ask about it in the interview.
